FOREWORD BY JUAN WILLIAMS

IN OUR COMMUNITIES WE SHOULD . . .

Support organizations that work to provide health care to underserved populations.
The Children's Health Fund is one of many organizations committed to providing health care to the nation's most medically underserved children and their families. Find out how you can make a difference, donate, or get involved at: www.childrenshealthfund.org/getinvolved/index.php.

Work with a community or faith-based organization to bring health education and services to our area.
Families USA (www.familiesusa.org) suggests raising awareness about the importance of screening for health problems and encouraging participation in already-existing public health awareness events.

IN OUR COUNTRY YOU COULD . . .

Get informed and get involved in the SCHIP reauthorization.
When SCHIP funding was extended through 2013, there will still be several million uninsured and several more million who fail to get adequate coverage or health services. For more information, visit www.cms.hhs.gov/home/schip.asp.

Make your voice heard with state and federal lawmakers to help American children get the care they need.
Stay informed about the important legislation that is being passed, affecting children's health. Visit <http://advocacy.childrenshealthfund.org/childrenshealthfund/home/> to learn the issues and latest news concerning children's health, and sign up to receive updates about when and how your involvement can make a critical difference.
